

PLACEMENT MANAGEMENT SYSTEM

Project Report

Submitted By

Sanika Bhosale

Technology Stack

- React.js
- Node.js
- Express.js
- MongoDB
- Google Gemini AI

Academic Year

2025–2026

Project Type

Full Stack Web Application with AI Integration

ABSTRACT

The Smart Placement Management System is a full-stack web application developed to simplify and automate placement-related activities in colleges. The system allows students to register, manage profiles, upload resumes, track job applications, and view placement opportunities. Placement coordinators can manage companies, monitor applications, and analyze placement statistics.

The application integrates Google Gemini AI to provide resume review, feedback, and improvement suggestions. This helps students identify skill gaps and improve their chances of placement.

OBJECTIVES

1. To provide a centralized platform for placement activities.
2. To manage student profiles and resumes.
3. To maintain company and job opportunity records.
4. To track student applications.
5. To generate placement statistics and reports.
6. To integrate Artificial Intelligence for resume analysis and improvement suggestions.

TECHNOLOGIES USED

Frontend:

- React.js
- HTML
- CSS
- JavaScript

Backend:

- Node.js
- Express.js

Database:

- MongoDB Atlas

AI Integration:

- Google Gemini API

Version Control:

- Git & GitHub

FEATURES IMPLEMENTED

Student Module:

- Student Registration and Login
- Profile Management
- Resume Upload
- Skills and Certifications Management
- View Placement Opportunities
- Track Applications

Placement Coordinator Module:

- Manage Companies
- Manage Job Openings
- View Student Records
- Placement Statistics Dashboard
- Application Monitoring

AI Features:

- AI Resume Review
- Resume Improvement Suggestions
- Skill Analysis

SAMPLE DATA

- 50 Student Records
- 10 Companies
- 20 Job Openings

RESULTS

The system successfully manages placement activities through a user-friendly web interface. Students can upload resumes and receive AI-powered feedback. Placement coordinators can monitor applications and generate placement insights efficiently.

CONCLUSION

The Smart Placement Management System provides an effective solution for managing campus placement activities. The integration of AI enhances the platform by helping students improve their resumes and prepare for placement opportunities.

FUTURE SCOPE

- Interview Question Generator
- Skill Gap Analysis
- Email Notifications
- Company Eligibility Prediction
- Placement Performance Analytics
